Foreword

THIS new Princeton Handbook has been carefully revised so that our customers may have a complete and accurate listing of Princeton Products. We offer a wide range of varieties and sizes of hardy, woody material for all types of landscape work. Both the small home owner and Public Works executives will find the Princeton Handbook a source of dependable information.

The stock is well grown and carefully handled with a minimum of exposure so as to insure the best planting results. All orders are freshly dug and the plants consequently are not injured by storage.

We wish to emphasize the fact that the material offered is Princeton grown in our own nursery consisting of over 1,000 acres. We mention this because very few firms can offer such a large assortment of their own grown material or stock which has been so carefully maintained in good condition.

Also, we call your attention to our ability to quote on large complete lists because of the comprehensiveness of our inventory. We specialize in furnishing materials for large parks and similar projects.

Conditions of Sale

PRICES, ETC.

The prices named in this list cancel all previous lists. They are based on current market conditions and are subject to change without notice.

TERMS AND DISCOUNTS

TERMS: 2 per cent discount for payment within 10 days from date of invoice. Accounts due 30 days from date of invoice. These terms are offered to those who establish credit, otherwise cash or satisfactory references are required.

Special Cash Discount
5 Per Cent For Payment With Order

C.O.D. Shipments: In order to insure acceptance, orders for C.O.D. shipment should be accompanied by one-third of the amount of the order.

PRICES ARE F.O.B. KINGSTON, N.J.

We reserve the right to reject orders which call for unusual items only. We expect that a reasonable quantity of the commoner items will be included in your order. This compensates in part for the high cost of producing varieties that others do not grow because they are too difficult or unprofitable.

GUARANTEE OF GENUINENESS:

We will send out healthy, thrifty stock, true to name. If any nursery stock proves untrue to description or variety name under which it is sold, we hold ourselves in readiness, on proper proof, to replace free of charge such stock that may prove untrue to description or name, or refund the original amount paid. We shall in no case be liable for any sum greater than the amount originally received for said stock.

CLAIMS

All sales are made with the understanding that we shall not be liable in event of crop loss, or of damage from other causes over which we have no control.

We will gladly correct any errors, but we cannot entertain any claims that are not made within ten days after receipt of the stock or are made after the stock has once been accepted. Claims should be made promptly in writing on receipt of stock.

Plants become your property upon delivery to transportation company and we cannot be responsible for loss, damage, or delay in transit.

All orders booked are based on the distinct understanding that the purchaser agrees to the condition of sales as stated above.

EXTRA CHARGE FOR BALLING

We recommend that all varieties marked with an asterisk(*) be lifted with a ball of earth and burlapped. Experience has shown that the loss in these plants, which is otherwise high, is reduced to a minimum if handled in this way.

SCHEDULE OF B & B CHARGES

The following charges are made to cover additional cost of balling and burlapping deciduous trees and shrubs that are not listed B&B. The size of ball for most stock is in accordance with the A.A.N. "Horticultural Standards" recommendations.

These charges are based on a *carefully dug*, solid ball of earth, *laced* with rope or wire, and handled according to the best nursery practice.

SPECIAL SELECTIONS—25% ADDITIONAL

A charge of 25 per cent additional on our regular listed price will be made for the special selection and marking in the nursery of extra heavy or specimen plants. We invite inspection of our material and on quantity orders will, if requested mark an average sample to assist our diggers in the selection of the grade wanted.

Notes in Explanation of Catalogue

The figures following each variety indicate in feet the approximate height of that plant in maturity. Ample allowance has been made for the many physical factors that tend to modify the growth of plants in cultivation.

The botanical and common names are taken from "Standardized Plant Names," which is the accepted authority on plant nomenclature in the horticultural industry.

Our standard of grading all plants is based on a schedule which has been adopted by the American Association of Nurserymen.

How to Reach Princeton Nurseries by Auto or Train

We are located midway between New York and Philadelphia. Both the Lincoln Highway and the new Super-Highway (Route 26) pass our nurseries.

The office of Princeton Nurseries is located on Lake Road, in the town of Kingston, New Jersey.

The nearest railroad stations are at Princeton and Princeton Junction, on the main line of the Pennsylvania Railroad. Phone Princeton 1776 or 1777 and we will be glad to come and meet you at either place.

The New York-Washington planes pass over our nursery hourly. When travelling by airplane, watch out for the interesting block arrangement from the air.

We would call your attention to the fact that we have one of the largest nurseries in the country with over 1000 acres of nursery stock. We are growing between 1100-1200 varieties of hardy woody ornamentals.

A cordial invitation is hereby given to visit our nursery at any time.

THE PALMER MEMORIAL STADIUM

When in Princeton for a football game or track meet in the Stadium, why not run out and take a look at the Princeton Nurseries?

BERBERIS

NEW HARDY EVERGREEN TYPES

We have a good assortment of these new varieties which are very attractive in both dark green, holly-like foliage and showy flowers. We consider this class of stock one of the most valuable additions to the broad-leaved evergreens. As a class nearly all have large thorns, spined leaves, and color beautifully in the winter months. Under favorable conditions most of them will attain a height of about six feet.

**NURSERY GROWN OAKS****Our Specialty**

The following list of Oaks is (we are told) one of the finest lots grown in America. For years we have been painstakingly building up a select lot of shade trees and have been convinced that Oaks would be finally recognized as one of the best shade tree groups. The increased popularity and demand have justified our conviction.

Our Oaks are straight stemmed with good heads and well defined leaders and have been transplanted several times so that the root systems are of the best.

They are especially adapted to highway and park planting and are available in quantity. We have over 100,000 including all sizes.

We handle our trees carefully, avoid exposure and take every precaution to insure safe transplanting.

FRENCH LILACS—NAMED VARIETIES
ALL ON OWN ROOTS

These are all grown from cuttings and are on their OWN ROOTS, which is the best method of propagation. The resulting plant is more permanent than the grafted stock commonly offered. We specialize in named Lilacs and are able to offer these superior grown plants at prices that compare favorably with inferior grafted stock. These named Lilacs generally grow from 6 to 12 ft. in height, depending on the variety and locality.

WE CAN OFFER THE FOLLOWING VARIETIES IN QUANTITY AT EXCEPTIONALLY ATTRACTIVE PRICES.
